Cadmium LHE®
5070 Touchup Travel Kit

Don’t get left on the ground!

SIFCO Applied Surface Concepts (ASC) introduces a new highly portable cadmium touchup kit for small LHE® Cadmium touch-up applications. The kit, specifically designed for the aviation industry, is ideal for AOG operations where repair times are critical. The kit contains the maximum amount of Cadmium solutions allowed for shipment via commercial and private ground carriers.

When aircraft are grounded for critical repairs, revenue is at risk. The touchup kit was designed for those situations where time is of the essence. The SIFCO kit contains everything a trained technician needs to quickly make repairs and get aircraft back into service.
Cadmium LHE® 5070
Touchup Travel Kit
Part Number 80507080

This kit will allow you to plate to the following specifications:
