

Aluminum Bus Option For Silver Non-Cyanide Bus Repair Kit

Don't get left in the dark!

SIFCO Applied Surface Concepts (ASC) has an option to expand the capability of the Silver Non-Cyanide Travel Kit for touch-up applications on aluminum bus components. The kit, specifically designed for the power generation and distribution industry, is ideal for outages and operations where repair times are critical.

SIFCO ASC's Silver Non-Cyanide solution provides a superior quality deposit that can be applied in the shop or anywhere in the field without the hazards associated with traditional cyanide silvers.

This add-on kit is designed to expand the capability of the Copper Bus Repair Travel Kit to be able to plate Non-Cyanide Silver onto aluminum bus connections on-site.

This SIFCO ASC kit, when used in conjunction with the Copper Bus Repair Travel Kit, contains everything a trained technician needs to quickly make repairs on aluminum bus connections and get power restored.

ADVANTAGES

- Portable process for on-site repairs
- Minimal masking and disassembly
- Custom, engineered solutions
- Faster than other plating methods
- Increase service life of components and equipment
- Superior technical expertise
- Quality plating results
